

WHAT IS BEHAVIORAL HEALTH?

Behavioral health includes the emotions and behaviors that affect a person's overall well-being. Behavioral health is sometimes referred to as mental health and often includes substance use. Just like physical health, behavioral health has trained providers that help much like a physical health care provider would.

Do you like
helping
people?

Do you care
for others'
well-being?

Can you
keep calm
& carry on?

The Behavioral Health field may be for you!

What are
my options?

In behavioral health, you can work with children, families, and/or adults with an mental health and/or substance use diagnosis in their homes, schools, communities or in an office based or residential setting.
